

The Business Blueprint

Blueprint To Financial Success

The United States **copyright law** protects "original works of authorship," fixed in a tangible medium including literary, dramatic, musical, artistic, and

other intellectual works. This protection is available to both published and unpublished works.

Copyright Infringement Penalties

Copyright infringement is the act of violating any of a copyright owner's **exclusive rights**granted by the federal Copyright Act. There are three elements that must be in place in order for the infringement to occur.

1. The copyright holder must have a valid copyright.
2. The person who is allegedly infringing must have access to the copyrighted work.
3. The duplication of the copyrighted work must be outside the **exceptions**.

The legal penalties for copyright infringement are:

1. Infringer pays the actual dollar amount of damages and profits.
2. The law provides a range from $200 to $150,000 for each work infringed.
3. Infringer pays for all attorneys fees and court costs.
4. The Court can issue an injunction to stop the infringing acts.
5. The Court can impound the illegal works.
6. The infringer can go to jail.

Buyer Shipping/House/Email/I.P Address from the customer will all be put in this pdf accordingly to prevent chargebacks/leaking of the guide. This is for my own safety. Your personal info is safe with me. This info can/may be used against you if you copyright/try to leak/ try to charge back.

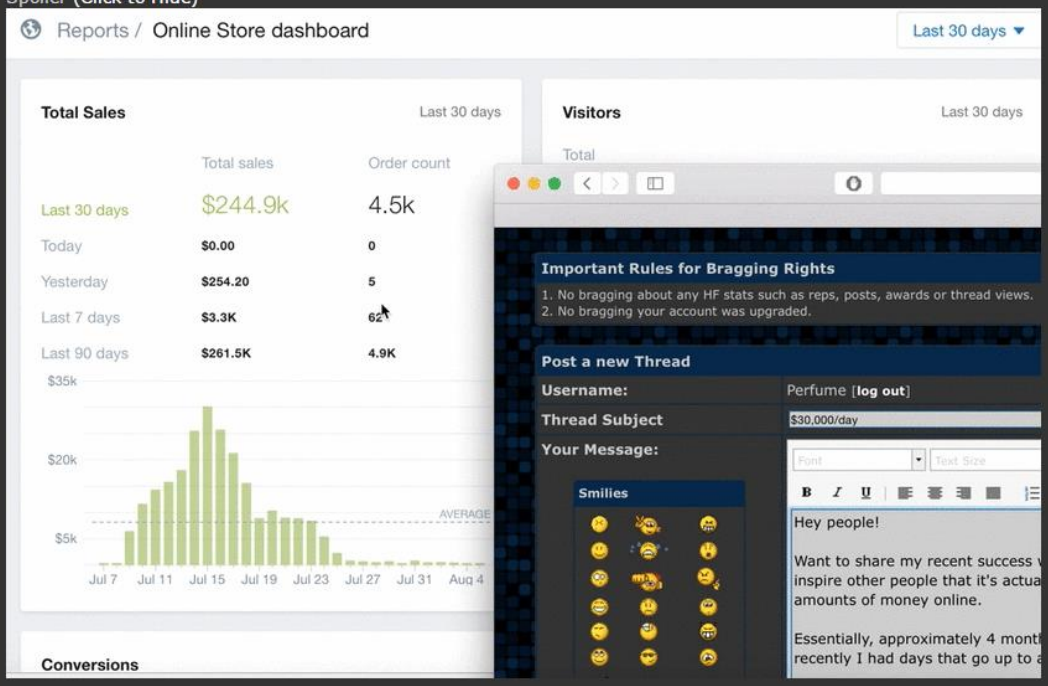

Any sales trashing on my thread will revoke your support option.

Method

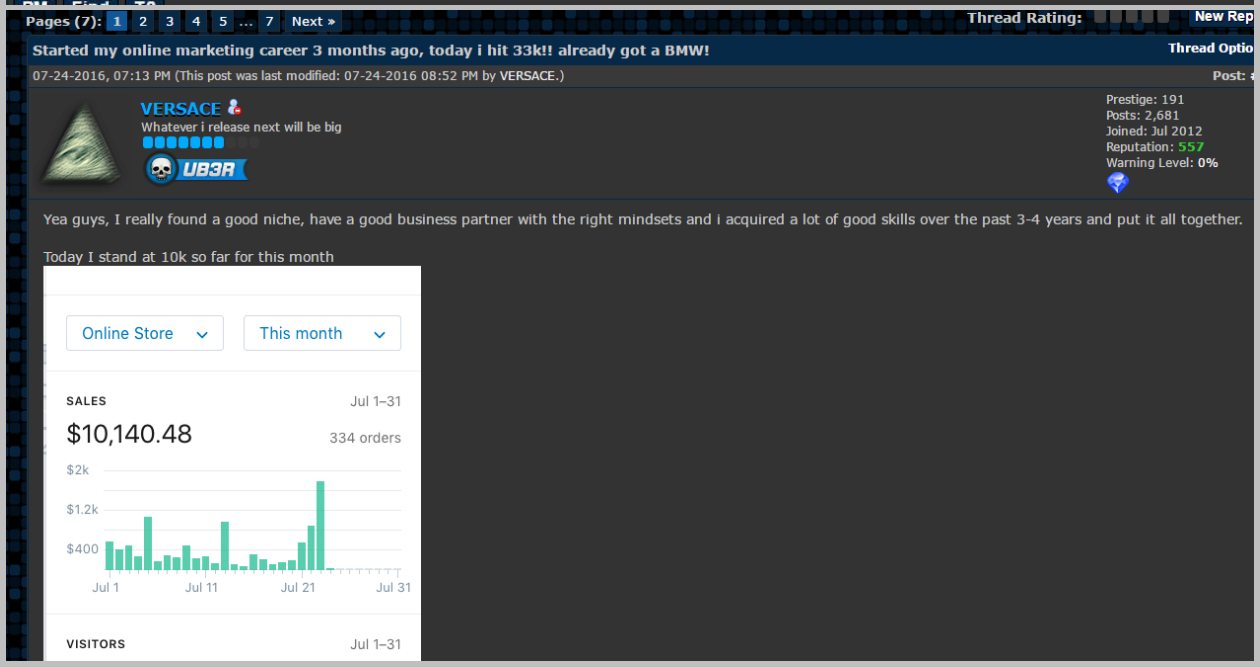

Now since you bought this guide I'm assuming you read through my whole thread where I state this isn't something that's going to make you thousands overnight with no work at all. Do not fall for those get rich schemes. Nothing comes easy. Yes this will require some work. However The results will be big if you succeed. I'd say around 95% of people who make a living online make a living through a website. If you want to make a living online or want to make A LOT of money then you need a website. You could become one of the 5% who don't own websites, But that is very very hard.

Many of you may have heard of the popular growing website shopify.com. If you look at H.F Alone there are many people who post in the bragging rights section posting about their shopify earnings more than anything else.

Spoiler (Click to Hide)

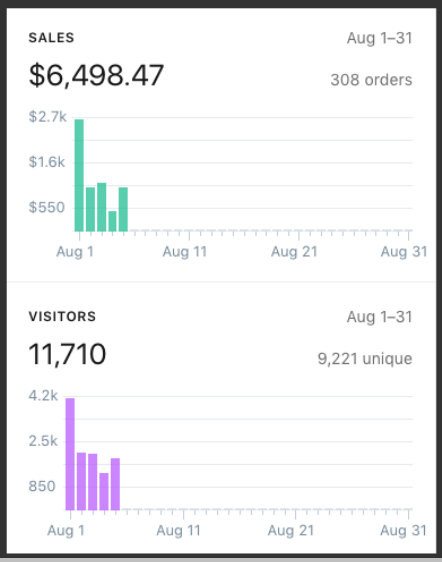

Yeah I stopped the adspend as it's hard to fulfil around 300 orders a day hence obviously the revenue dropped.
Questions welcome!

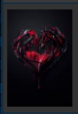

Well you guys, I never thought i'd be in this position but i am a fucking genius, i am killing it right now, and this is just the beginning.

Earlier i made a thread about 14k in 1 month I think, well this month im definitely gonna hit 30k/mo!!!

yep $30,000 per day kinda cool — **Thread Options**

Hey people!

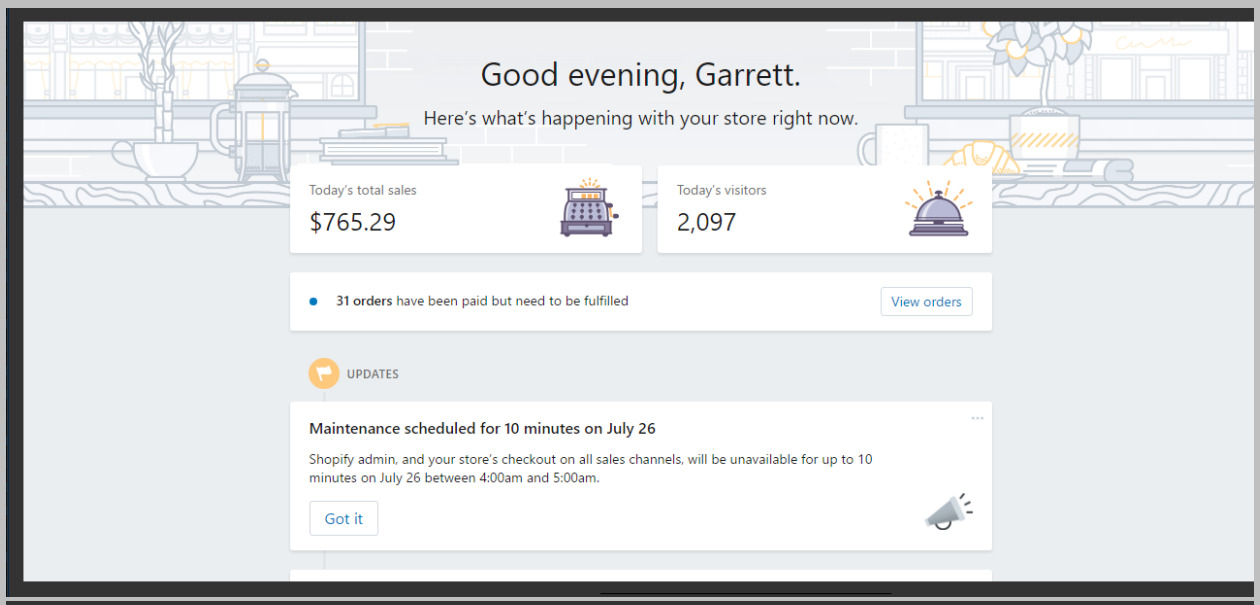

Want to share my recent success with Shopify Dropshipping in order to inspire other people that it's actually possible to make exceptional amounts of money online.

Essentially, approximately 4 months ago was my start with Shopify and recently I had days that go up to around $30k in revenue.

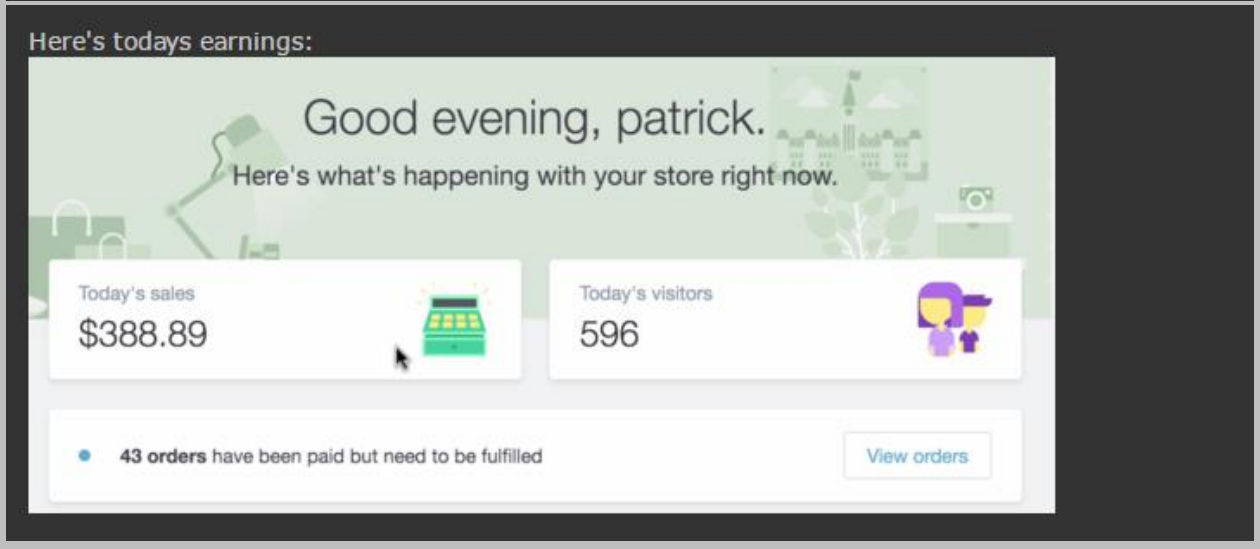

Note that this is obviously not all profit but it's around 30%-35%, which is still very nice.

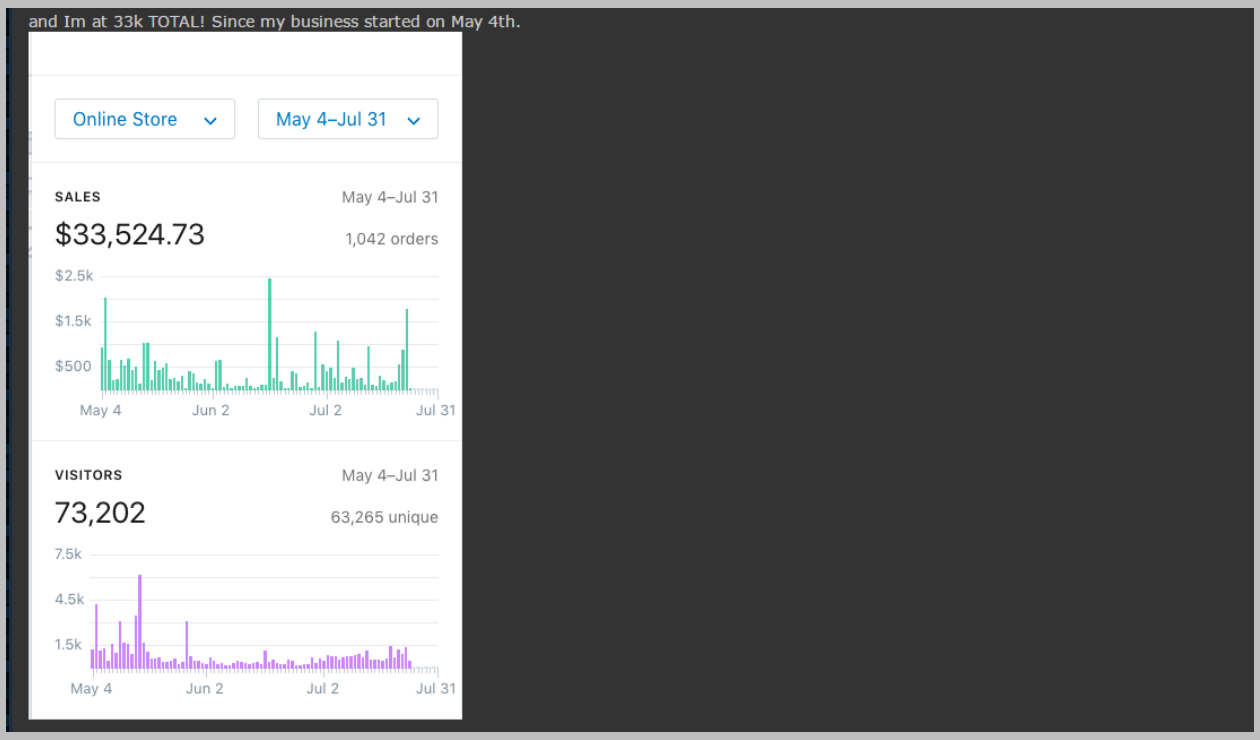

Spoiler **(Click to Hide)**

Here's todays earnings:

Now you may be wondering "How do these guys make so much money"

Well that is what I will be showing you in this guide.

I will be teaching you the tips and tricks on how these sellers are netting in almost $1000 per day. Yes that is right. $1000 per day!

Now you are not going to make that much instantly. However you will be able to make a lot lot of money if you put in the time and effort into driving traffic.

Now first things is first. We want to get hosting and we want to get a namecheap domain since a domain is cheap to get.

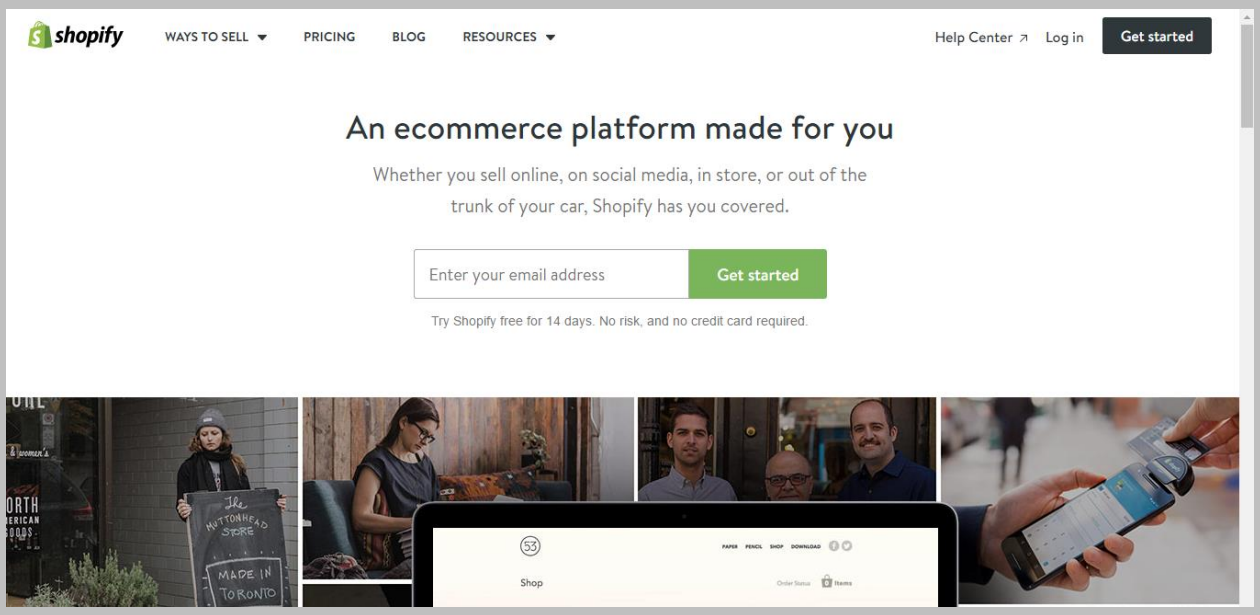

You can get free hosting and you are able to get a free site name. But if you want to make your website look more professional I suggest getting a good .com domain name.

The more professional your site looks and the more time you spend on it the more money you will make in the long run.

So what we will do now is get your 14 day trial on shopify.

shopify.com

go to this website ^

You get a free 14 days of shopify per email.

Everything else is self explanatory and then you name your shop.

You will be using your own niche you specialize in or your own niche that you decide to choose.

You are able to look on
http://www.aliexpress.com/

For niche items to sell.

https://www.youtube.com/watch?v=8S-4pZtyLIw

oberlo app ^

Use the “Obelo app on shopify to quickly add and import items to your shopify store

I will be showing you how to get traffic later on in the guide. But for now what we will do is focus on getting a niche for you.

I will be finding my own niche on aliexpress.com

After the buyer buys you can ship the item to the buyer through aliexpress.

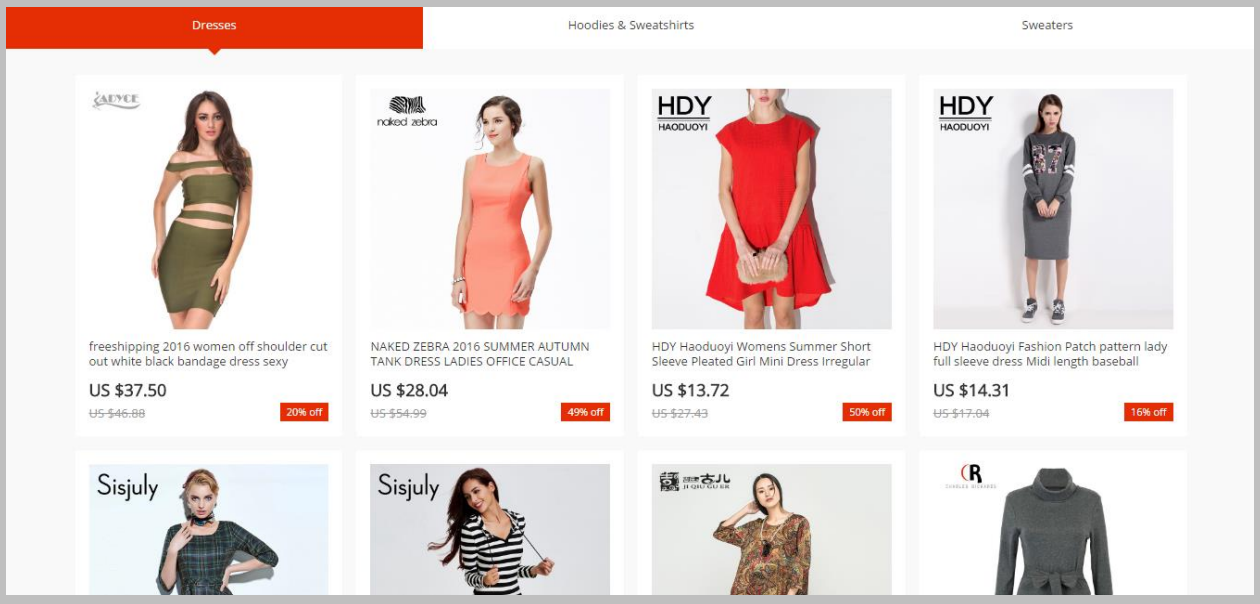

The great thing about shopify is that you can either use paypal/if you don’t have paypal you are able

to use shopify to get payments and then the $ will transfer all the way over to your bank account.

The example that I will be using on aliexpress is fashion.

Fashion is a popular niche. The great thing about this guide is that there are millions and millions of different niches that you can choose and everyone thinks different so everyone will have a different type of product/item that they will be selling. So there is a 0% chance of saturation for this method.

I suggest trying to think outside the box.

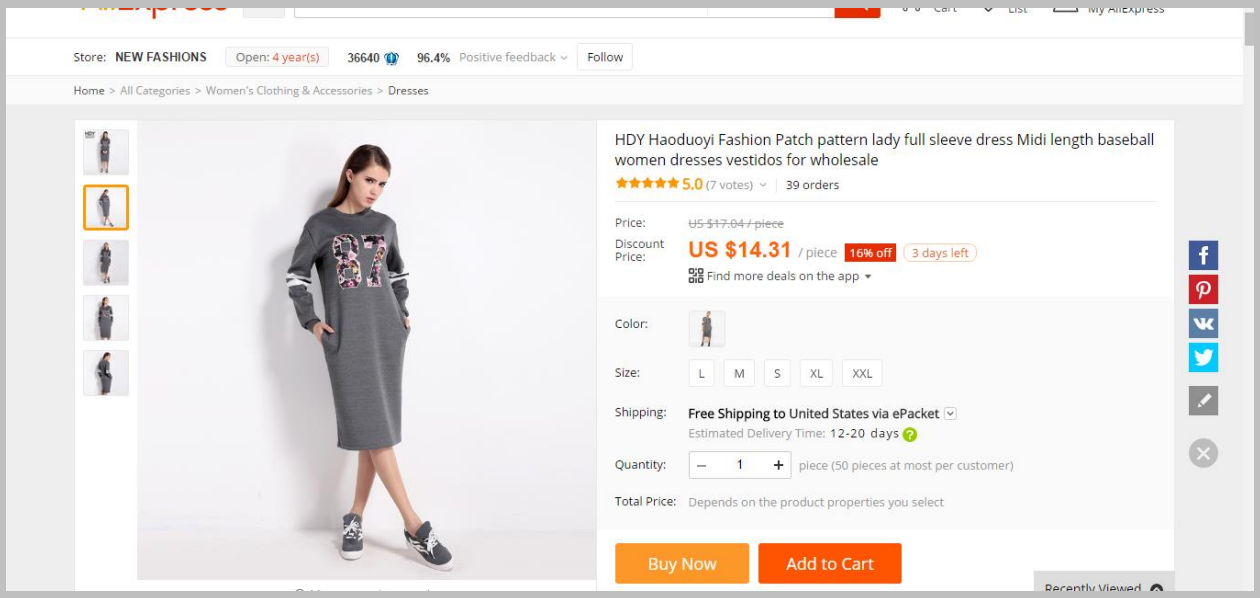

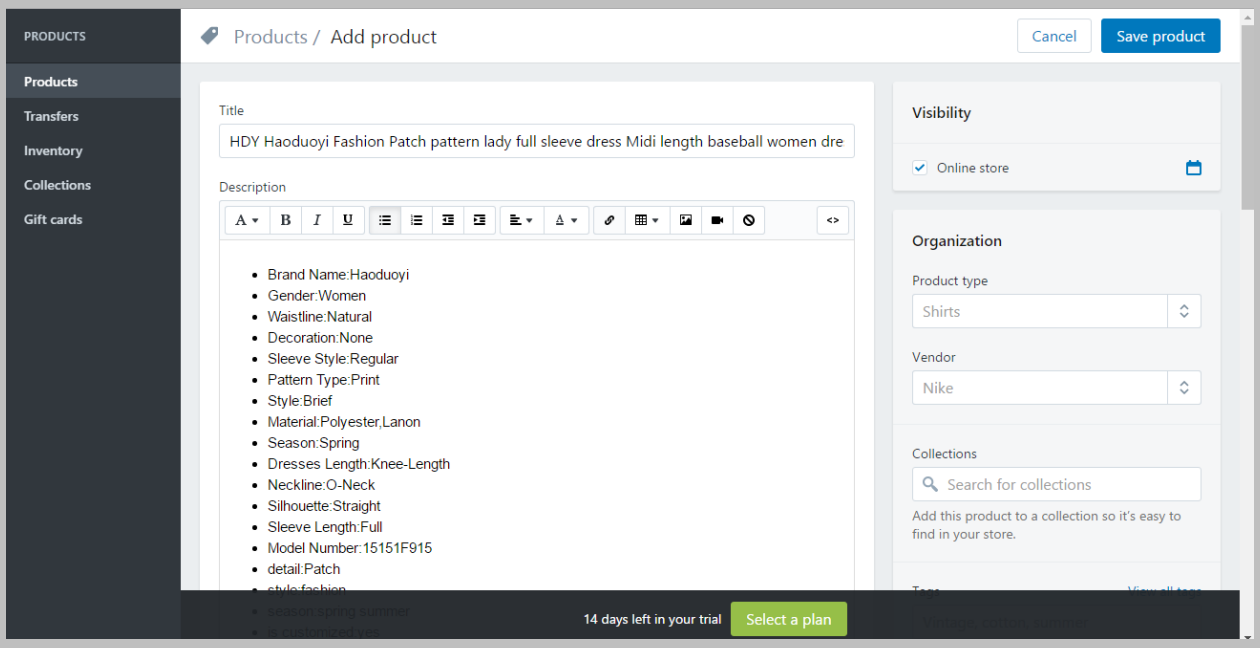

Here are popular fashion items.

We will be targeting women when we try to get traffic since these are womens clothing.

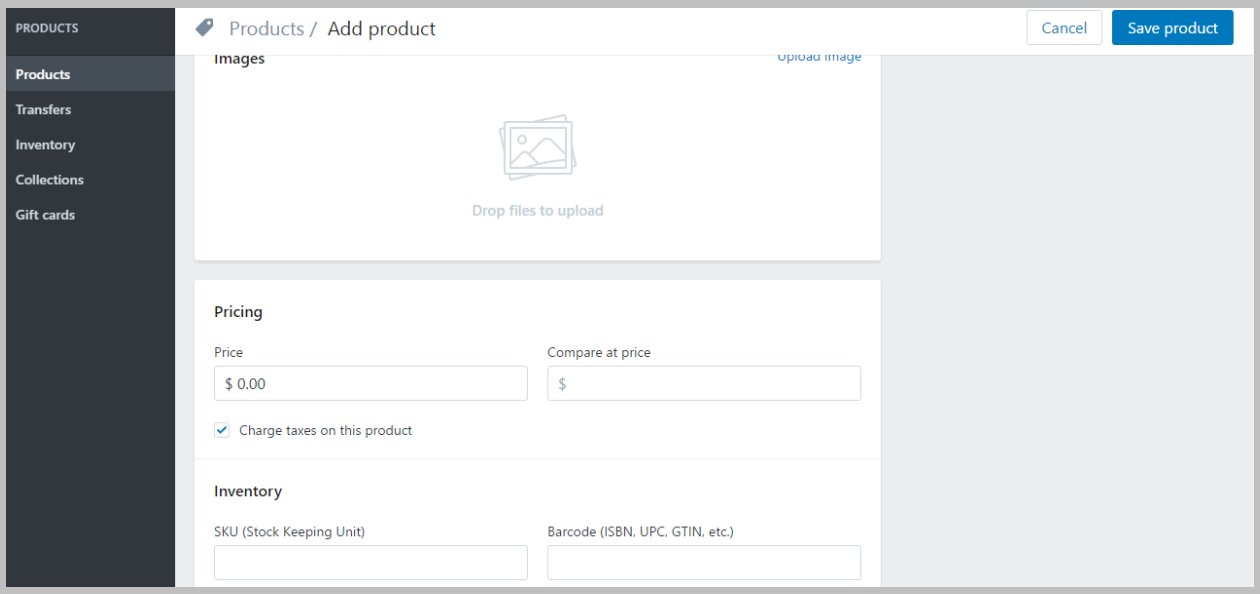

On aliexpress the items are cheaper than they are for retail. We will be selling the items for around 2x the price. The items are already on sale so this makes it even better for you.

Now note that you are able to use other sites rather than aliexpress. However the only site that I use is aliexpress. However I am also sure that there are tons of other sites out there that may be better.

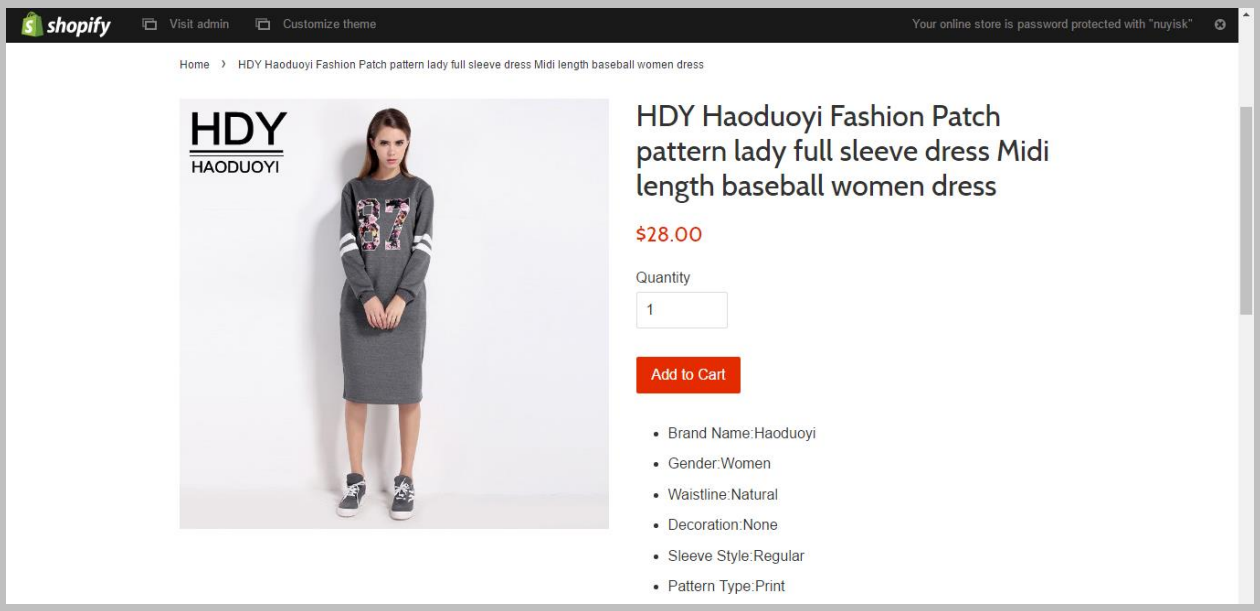

Then you will go to add product and you will copy the title and the description of the post.

Then you will add the picture and price/etc..

I sugesst putting the price around 1.5-2x the amount that the item is going for.

As for the picture it should let you left click on the picture from the website and download it but in some cases it may not so you may have to find the picture on google or you may have to take the picture from your phone.

Now that we have set everything up we finally have our first product up for grabs.

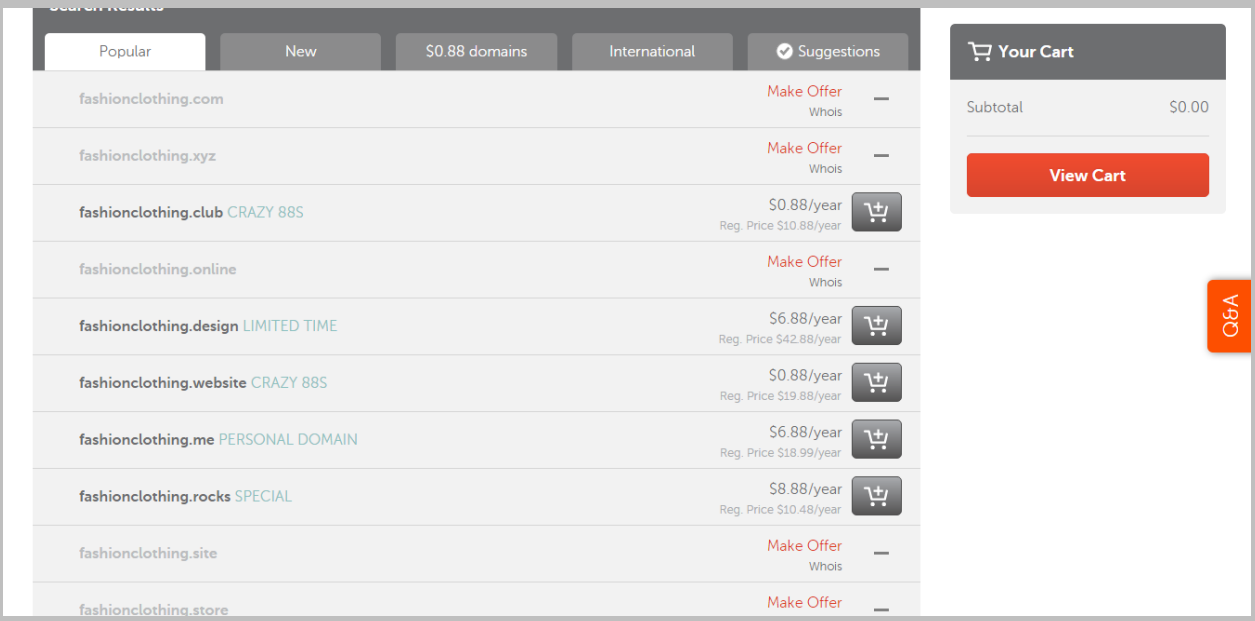

I do not think I need to go through this process again for other products so I will leave it at one and go on to the next step.

Now that we got our 1st product out we can either

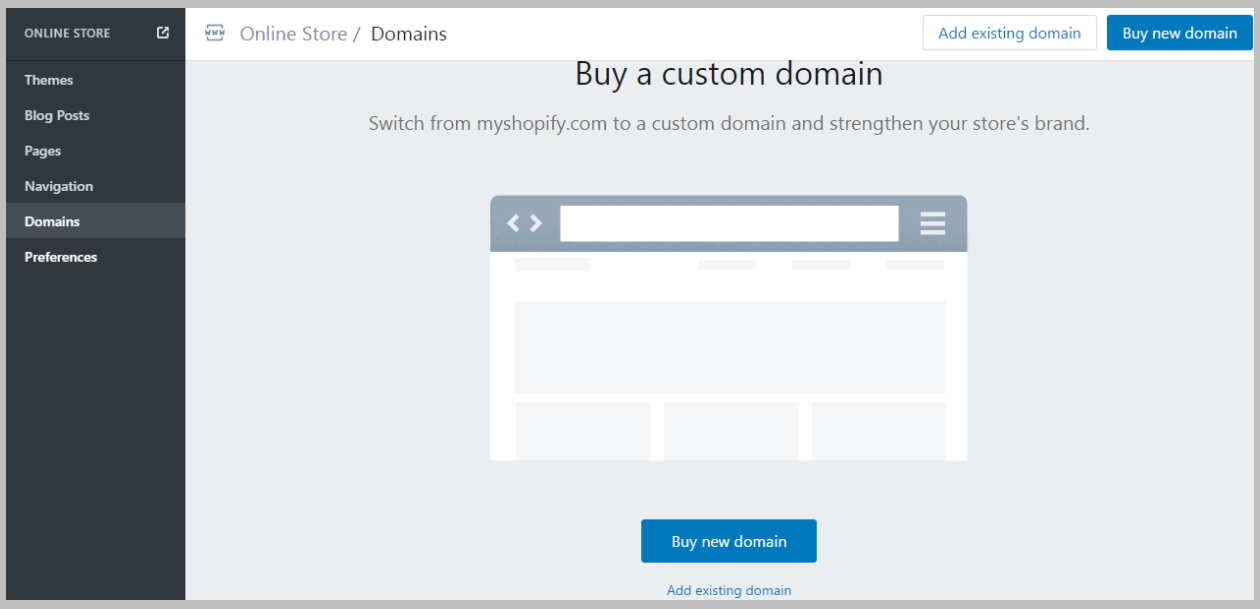

Buy a domain or we can keep the free shopify domain that we have been given.

Now if you want your website to look more professional then I suggest getting a brand new domain off namecheap or off of shopify.com

https://www.namecheap.com/

It will show you all the website names that are available. I suggest getting a .com domain to look more professional.

Now once you buy the domain you will go to domains on your control panel on shopfiy and you will transfer the domain over by clicking "Add existing domain"

I suggest buying a domain off namecheap instead of shopify so you can save $.

Now once the domain transfers over we are all set and ready to go!

https://www.youtube.com/watch?v=yeVr4lYByb8

here is a vid showing you how to transfer just in case you get lost.

Make sure to at least have around 4-5 products that are related to your niche.

Now you store should be 100% setup. If you want some gfx you can look around for gfx either on fiverr/h.f/other types of websites.

Now what we will need to do is get traffic.

There is absolutely no way at all that you can make money without driving traffic. There are literally so many ways that you can drive traffic. I will be showing you the most effective and least cost efficient ways. You can also use ad services such as google ads/etc..

The 2 that I will be using is

-google ads

-twitter

You can also use facebook ads/other types of advertising ways

https://www.youtube.com/watch?v=-3JGmwMmsVk

video on how to use google ads ^

https://www.youtube.com/watch?v=xgwygBHhha0

how to use youtube ads ^

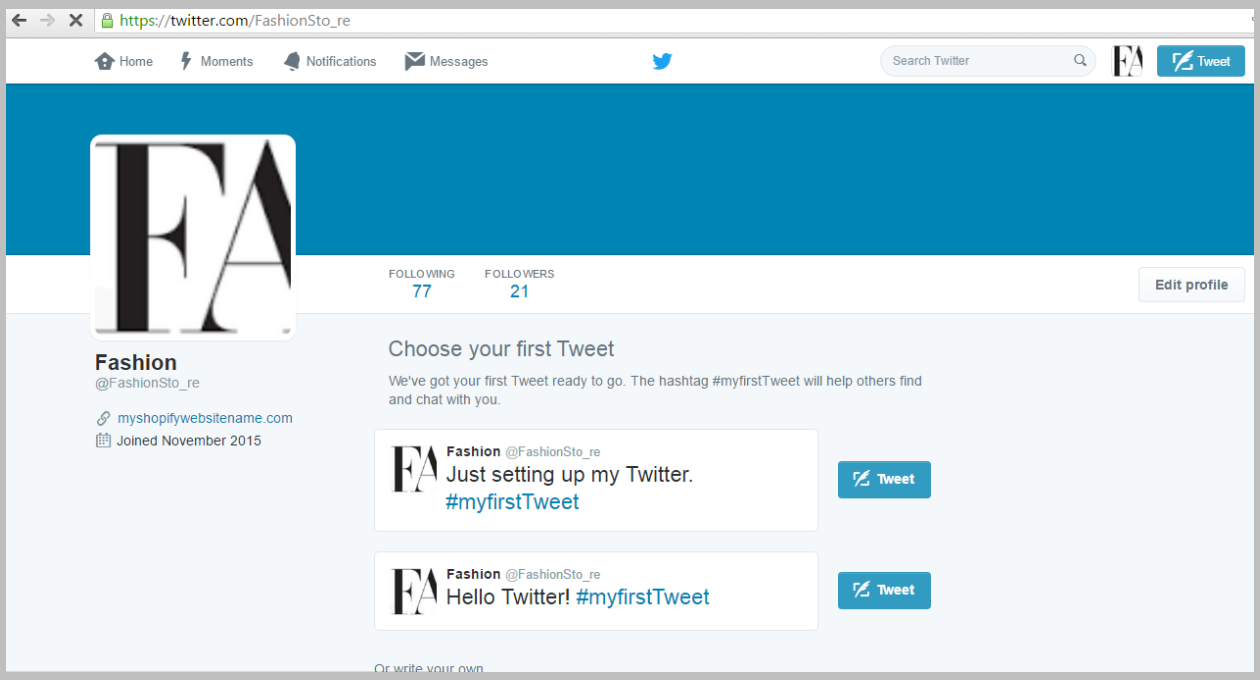

https://www.youtube.com/watch?v=aVoe4tMH5YQ

how to use facebook ads ^

Now note that you need to get targeted traffic!

Now for twitter what you will do is make a brand new account similar to your website

So the example I will be using is fashion so your account on twitter will be named with the word fashion in it.

I did not give much thought to the name/etc.. of this since this is just an example.

So you will put your website link in your bio.

You go to edit profile and you can edit all of that.

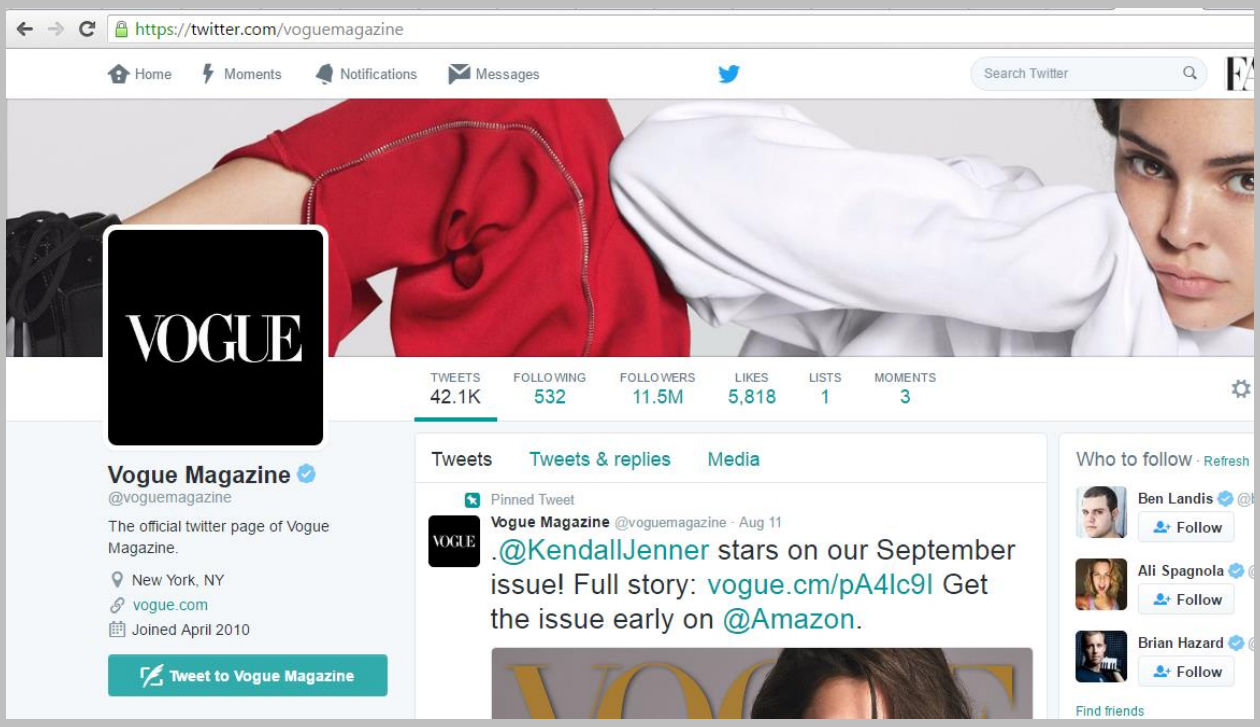

Once you do all that I suggest getting a good cover photo and a good background photo for your twitter.

Once all of that is done then you will start getting your traffic.

For this you can either use a bot or you can do this manually.

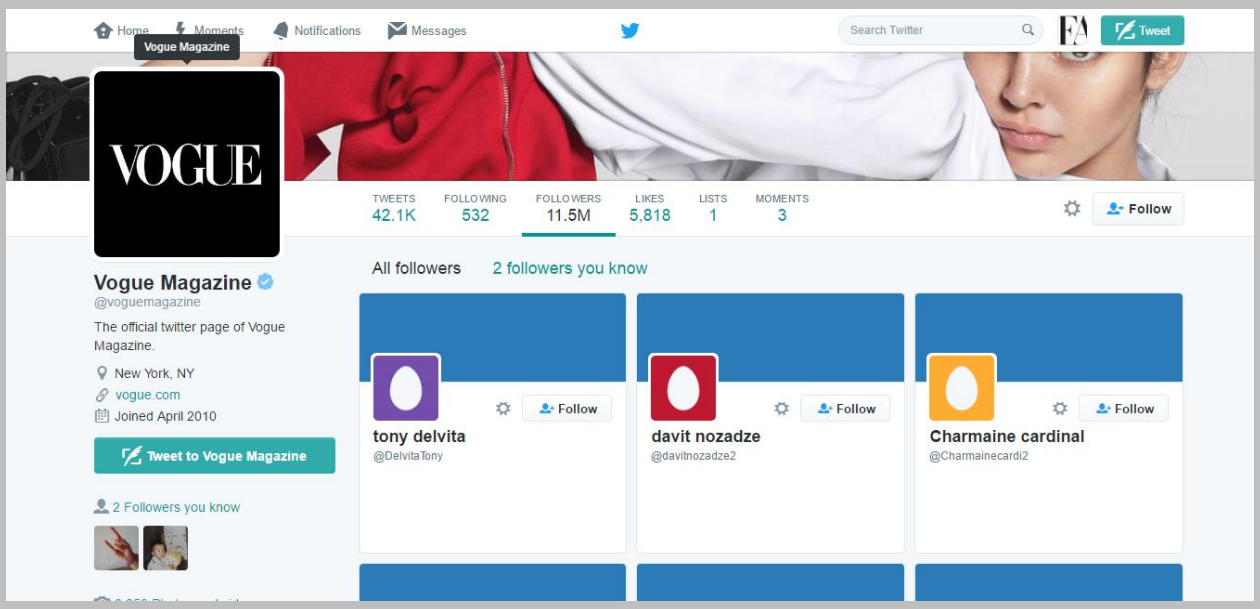

A bot is good but remember it costs $ for a twitter bot.

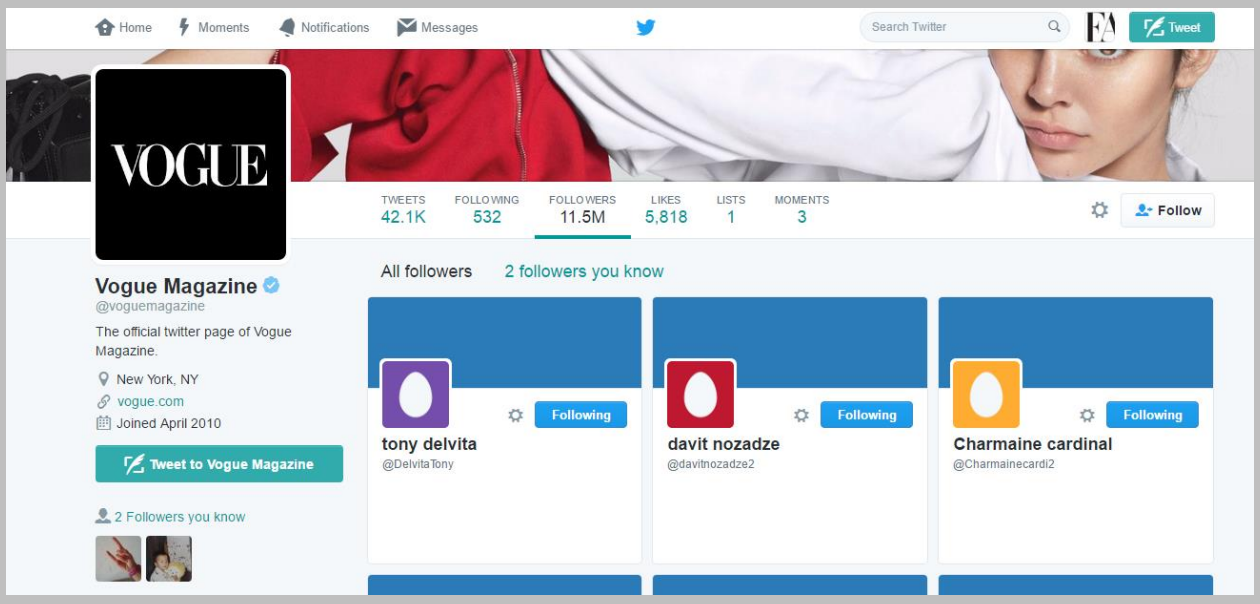

You are able to google around and you will find many and many twitter bots.

Now I have typed in "Fashion" on twitter and I have gone onto a fashion page.

Now what we are going to do is steal this persons followers. Not literally steal but we will follow the people who follow this fashion page.

You will go to the people who are following the account and you will follow them

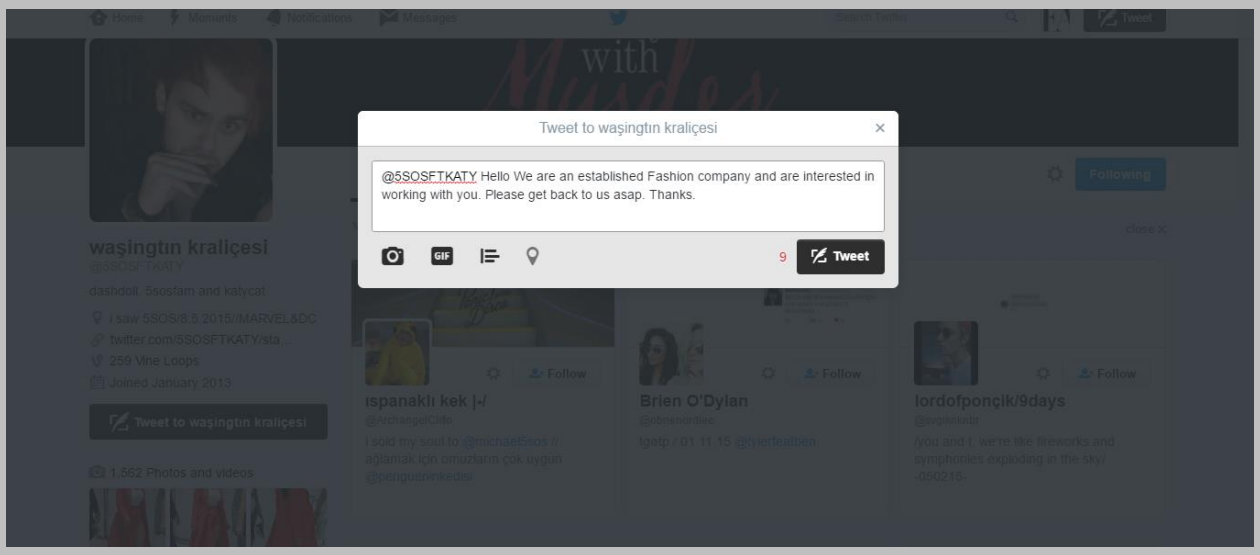

You can do this via the bot as well.

Now majority of these people will follow you back since they are interested in fashion.

Make sure to posts tweets about the products that you are selling before you start getting followers.

Now you will keep on following people from that page or from other pages and stealing their followers.

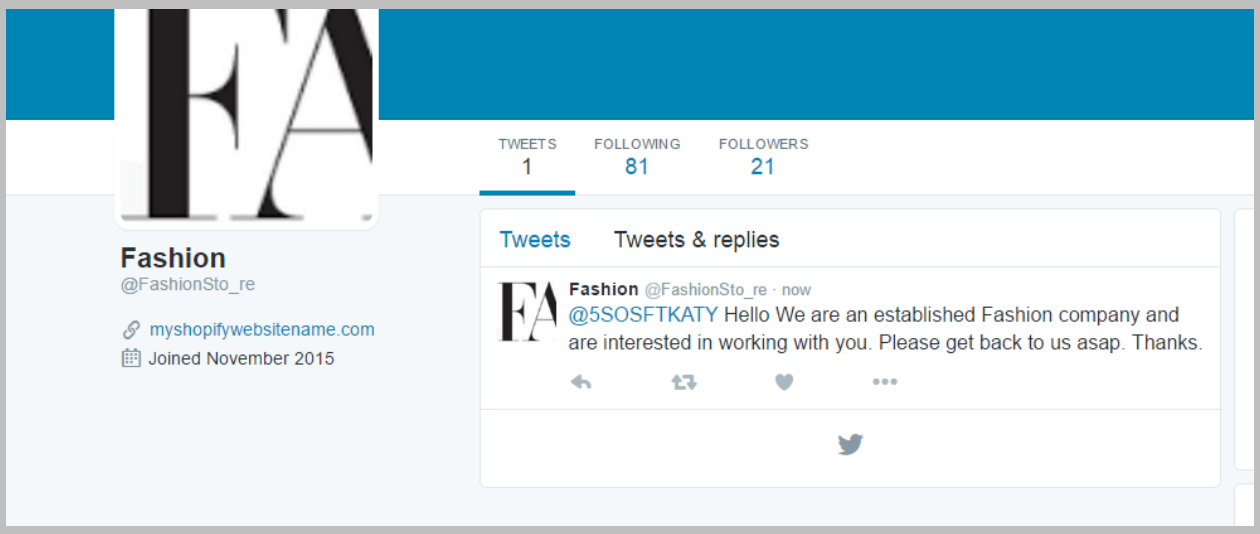

This is 100% legit to do and other pages do this method all the time.

Now you will find other fashion pages and try to work with them

Try to find pages which have over 5k+ followers

Do not message the pages that have like 10 million followers! Those pages are an already established business and will not be interested at all in working with you.

Now do this over and over again on many pages.

Even finding 1 page aka 1 lead can net you around hundreds/thousands and thousands of dollars in profit depending on how long the partnership lasts and how long the partnership is for.

If they agree what you will tell them is

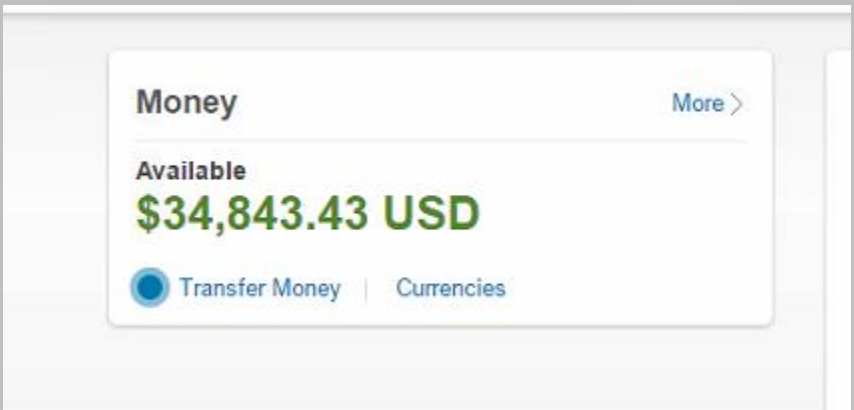

That

“ I am able to give you a coupon code for my website” I will give the people 10-20% off the order and everyone who uses your coupon code I will give you 10-20% of that profit.

Once they shout out your product and they get you sales then either send them the $ through paypal or send them the $ through btc. There is no point at all in scamming the people who are willing to work with you!! That is pointless.

Now twitter many not be the most efficient. You can think outside the box and use fb/Instagram/other types of social media as well and advertise on diff places. If I went on with all the places that you cold advertise then this guide would be 1000+ pages long. I’m sure that you get the point by now on how to get traffic. Remember this is going to be a long term process and once your business gets rolling it will pretty much be on autopilot. Once the person orders you will just get

the item off Alibaba or you can ship items yourself ☺

These are my earnings in the past 3 and a half months. You will get to making this much in no time!
